

GREEN PASSPORT – INVENTORY OF HAZARDOUS MATERIALS (IHM)

SHIPOWNERS

- "Through this agreement we will show continuous improvement in health, safety and security throughout the supply chain"

Jon August Houge, Fleet Manager in Siem Offshore AS

DOES YOUR VESSEL CONTAIN HAZARDOUS MATERIALS? 10 REASONS WHY YOU SHOULD OBTAIN YOUR GREEN PASSPORT / IHM:

- **Mandatory:** Obligated maintenance for all vessels with an existing Green Passport / IHM.
- **Reducing Risks:** Be prepared for unannounced inspections which can lead to detentions.
- **Responsibility:** Create awareness and safeguard your crew and passengers.
Avoid compensation claims by crew members.
- **Control:** An IHM safeguards the shipyard and shipowners.
A claim goes directly to the responsible part (supplier 1, 2, 3.)
- **Avoid or consider claims:** Forward the liability question to the responsible part.
- **Money:** IHM preparation will be cheaper prior to Hong Kong Convention / EU legislation entry's into force.
- **Be a leader:** Make your staff familiar with the legal requirements
- **Be served in time:** There will be an obvious "bottleneck".
- **Image:** Be a role model for your industry and use this as a competitive advantage.
Protect your image by showing responsibility for crew, passengers and recyclers.
- **Keep your assets:** Identify reasons for reduction of value for your vessels.
Avoid contamination of your ship, and make others pay for "pollution" and clean-up of your ships.

Maintenance according to IMO regulations. Shipowners are often let to themselves after receiving the GP/IHM documentation with few or none options to maintain it. Metizoft gives you the solution!
